PROFESSIONAL SUMMARY

Motivated Full Stack Developer with hands-on experience delivering modern, scalable web applications from concept through production. Proficient across the entire stack — from pixel-perfect React and Next.js frontends to resilient Node.js/Express APIs and vector-search AI pipelines. Proven ability to implement secure role-based systems, integrate large-language-model tooling (RAG, LangChain, OpenAI), and ship cloud-ready solutions on Vercel and containerised environments. Currently pursuing a BSc in CSE (Dec 2026) while actively building client-facing projects on Freelancer.com.

TECHNICAL SKILLS

Frontend	React, Next.js, JavaScript (ES2024+), TypeScript, Tailwind CSS, Bootstrap
Backend	Node.js, Express, GraphQL, RESTful APIs, MySQL, MongoDB
AI / ML	LangChain, OpenAI API, Pinecone (vector DB), RAG architecture, Rasa NLU
Cloud & DevOps	Docker, Kubernetes, Vercel, CI/CD pipelines
Tools	Git, GitHub, Figma, Postman

KEY PROJECTS

AI Knowledge-Base Platform

Next.js · OpenAI API · Pinecone · LangChain · Vercel AI SDK

- Engineered a production-ready RAG pipeline using LangChain for context-aware natural-language querying of custom document sets.
- Generated and stored vector embeddings with OpenAI + Pinecone, enabling sub-second semantic search across large corpora.
- Built a streaming chat UI with the Vercel AI SDK delivering real-time, low-latency responses.
- Designed robust multi-format data ingestion pipelines (PDF, DOCX, TXT) to support instant knowledge retrieval.

Disaster Resource Coordination Platform

React · Node.js · Express · MongoDB

- Built a full-stack emergency-management platform to coordinate food, medical supplies, and shelter resources in real time.
- Implemented a granular role-based access control (RBAC) system securing data operations across admin, coordinator, and volunteer tiers.
- Designed a responsive dashboard with real-time inventory tracking, status updates, and geolocation-aware resource allocation.

E-Commerce Platform with AI Chatbot

React · Python · Rasa Framework · REST API

- Delivered a feature-complete e-commerce store (cart, checkout, order history) integrated with a custom Rasa NLU chatbot.
- Reduced support overhead by enabling natural-language product search and order-tracking queries through the conversational agent.
- Implemented intent classification and entity extraction models, achieving high accuracy on product and logistics queries.

EXPERIENCE

Full Stack Developer — Freelance

Remote | 2023 – Present

- Designed, built, and deployed production-grade web applications independently, owning the full lifecycle from wireframe to hosting.
- Maintained a Freelancer.com profile delivering client projects across e-commerce, data platforms, and AI integrations.
- Applied clean-code principles, modular architecture, and code reviews to produce maintainable, well-documented codebases.
- Collaborated with clients to translate business requirements into technical specifications and iterative delivery milestones.

EDUCATION

Bachelor of Science in Computer Science & Engineering

Sylhet, Bangladesh
